

Overview

1 Section 1

2 Section 2

3 Section 3

Here Comes Section 1

First Frame

This is the first frame. It's not very exciting, but still it's the first frame.
Slides should contain a descriptive text. But not full sentences like these.

Second Frame

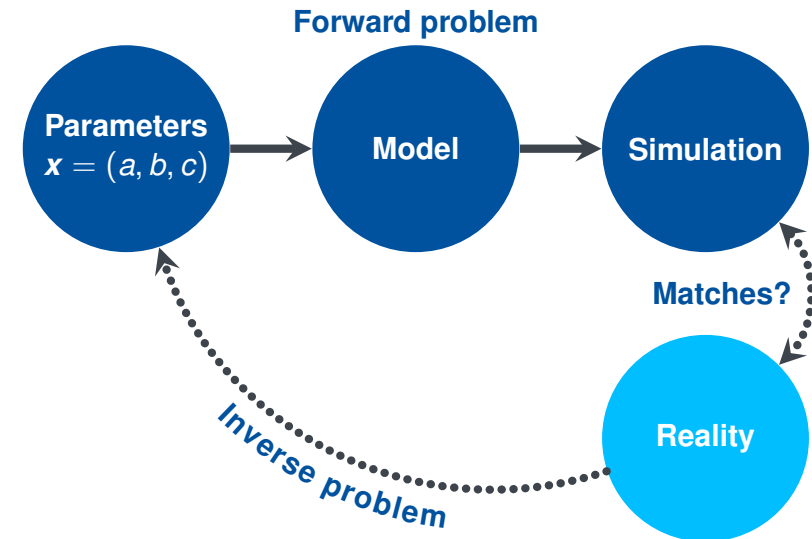

The second frame... it doesn't get any better.
Here is an `itemize` list:

- First item
- Second item
- Last item

Note the round dots before the items.

This Is Section 2

TikZ Example

Another Frame

At the top, you can see the progress throughout the presentation. Each circle (round shapes – yay!) stands for one frame. For this to work, you have to add subsections in your presentation (if only with an empty text). Also, there is a progress bar beneath.

Now the Last Section

Second to Last Frame

Last Frame

Now we're in Section 3.

Here is an enumerate list:

- ① First item
- ② Second item
- ③ Last item

Again note the round shapes...

This is the final frame.

Thank you for your attention!
